

Ant, Spider, Native Cockroach & Earwig Pre-Treatment Checklist

GIPPSLAND
PEST MANAGEMENT

Description of Treatment

At Gippsland Pest Management, we provide a thorough and effective treatment to protect your home from Ants, Spiders, Native Cockroaches and Earwigs. Our service includes inspecting your property, applying targeted treatments to key areas deemed necessary and safe by our technicians and offering prevention advice to minimise future infestations.

Using safe and environmentally responsible methods, we ensure long-lasting results while keeping your family, pets and property safe.

Thank you for choosing Gippsland Pest Management for your Ant, Spider, Native Cockroach & Earwig Treatment, prior to our arrival please ensure the following has been carried out:

- General Housekeeping has been carried out
- Ensure all shoes, pet bowls and pet bedding have been brought inside away from the external treatment area.
- Ensure washing has been removed from your clothesline.
- Ensure all windows and doors are closed prior to and during treatment and until the chemical has dried. Approx. 1-2 hours.
- That arrangements have been made for all pets such as dogs, cats, birds, fish, rabbits and guinea pigs to be isolated away from the treated areas until they are dry.
- All individuals, including adults and children, should remain inside the home until the treatment on the exterior has dried or vacate the home prior to treatment commencing. This may take up to 4 hours.
- That our technicians are aware of any ponds or pet fish at the property.
- All shedding and garage areas that you would like treated are unlocked and access is available for our technician.
- Please advise our technicians if there are any areas of your home you would like to have excluded from your treatment

Control Period & After Care Program

This treatment comes with a 6-month After Care Program, which provides coverage for our technicians to revisit your property during this period for any issues related to ants, spiders, native cockroaches, and earwigs.

Please note that after the initial treatment, it may take up to **30 days** to achieve full control of the pest population on-site.

Payment Options

Payment for this treatment is required on the day of service. Gippsland Pest Management accepts cash, EFT, and cheque, and our staff are equipped with EFTPOS machines for credit card payments.
