

# Rodent Pre-Treatment Checklist

**GIPPSLAND**  
**PEST MANAGEMENT**

## Description of Treatment

At Gippsland Pest Management, our Rodent Treatment focuses on effectively managing rodent infestations using professional-grade baiting systems. We carefully assess the level of activity, identify problem areas, and strategically place tamper-resistant bait stations for safe and effective control.

## Thank you for choosing Gippsland Pest Management for your Rodent Treatment, prior to our arrival please ensure the following has been carried out:

- General Housekeeping has been carried out
- That you have notified our technician of any problem areas you are having onsite.
- All shedding and garage areas that you would like treated are unlocked and access is available for our technician
- Please advise our technicians if there are any areas of your home you would like to have excluded from your treatment

## Pet Safety:

At Gippsland Pest Management, we prioritise the safety of your pets during rodent treatments. The bait we use is carefully selected for its effectiveness in managing rodents while ensuring minimal risk to non-target animals. All baits are placed in tamper-resistant bait stations, preventing pets from accessing them.

Additionally, the bait we use contains an antidote (Vitamin K1), providing an extra layer of safety in the unlikely event of accidental ingestion. Our team is always available to provide guidance on monitoring your pets and how to act quickly if an issue arises.

With Gippsland Pest Management, you can trust that your pets are protected while we work to keep your property rodent free.

## Control Period & After Care Program

This treatment comes with a 6-month After Care Program, which provides coverage for our technicians to revisit your property during this period for any issues related to rodents.

Please note that after the initial treatment, it may take up to **30 days** to achieve full control of the pest population on-site.

## Payment Options

Payment for this treatment is required on the day of service. Gippsland Pest Management accepts cash, EFT, and cheque, and our staff are equipped with EFTPOS machines for credit card payments.
