

Speciality Pre-Treatment Checklist

GIPPSLAND
PEST MANAGEMENT

Description of Treatment

At Gippsland Pest Management, we offer tailored treatments for specialty pests that require a unique approach, such as Fleas, Bed Bugs, German Cockroaches, Bird Mites, Carpet Beetles and Clothes Moth. Our technicians begin with a detailed inspection to understand the pest's habits, hideouts and level of activity.

Using targeted, professional-grade products and techniques, we effectively treat the pest while ensuring the safety of your family, pets & property. Each treatment is customised to suit the specific pest and environment, guaranteeing the best result.

Thank you for choosing Gippsland Pest Management for your Speciality Treatment, prior to our arrival please ensure the following has been carried out:

- General Housekeeping has been carried out
- Ensure all shoes, pet bowls and pet bedding have been brought inside away from the external treatment area.
- Ensure all personal belongings have been picked up off the floor and all bedding has been put through a hot wash on the day of treatment
- Ensure washing has been removed from your clothesline.
- Ensure all windows and doors are closed prior to and during treatment and until the chemical has dried. Approx. 1-2 hours.
- That arrangements have been made for all pets such as dogs, cats, birds, fish, rabbits and guinea pigs to be isolated away from the treated areas until they are dry.
- That all people (Adults and Children) vacate for a minimum of **4 hours** on the day of treatment.
- That our technicians are aware of any ponds or pet fish at the property.
- All shedding and garage areas that you would like treated are unlocked and access is available for our technician.
- Please advise our technicians if there are any areas of your home you would like to have excluded from your treatment

Flea Treatment Requirements

Please mow your lawn before the treatment to help the chemicals reach the soil.

Vacuum carpets on the morning of treatment to agitate and hatch any embedded eggs for a more effective treatment.

Control Period & After Care Program

This treatment includes a **30 Day** After Care Program. This means you are covered for our technicians to reattend your property within this timeframe for any issues regarding Speciality Pests.

Payment Options

Payment for this treatment is required on the day of treatment, Gippsland Pest Management can accept payment via Cash, EFT & Cheque.
