

# Spider, Native Cockroach & Earwig Pre-Treatment Checklist

**GIPPSLAND**  
**PEST MANAGEMENT**

## Description of Treatment

At Gippsland Pest Management, we provide a thorough and effective treatment to protect your home from Spiders, Native Cockroaches and Earwigs. Our service includes inspecting your property, applying targeted treatments to key areas deemed necessary and safe by our technicians and offering prevention advice to minimise future infestations.

Using safe and environmentally responsible methods, we ensure long-lasting results while keeping your family, pets and property safe.

## Thank you for choosing Gippsland Pest Management for your Spider, Native Cockroach, and Earwig treatment. Before our arrival, please make sure the following steps have been completed:

- General housekeeping has been carried out.
- Bring all shoes, pet bowls, and pet bedding inside, away from the external treatment areas.
- Remove any washing from your clothesline.
- Ensure all windows and doors are closed before, during, and for about 1-2 hours after treatment, or until the chemical has dried.
- Make arrangements for all pets, including dogs, cats, birds, fish, rabbits, and guinea pigs, to be kept away from treated areas until they are dry.
- All individuals, including adults and children, should remain inside the home until the treatment on the exterior has dried or vacate the home prior to treatment commencing. This may take up to 4 hours.
- Inform our technicians of any ponds or pet fish at the property.
- Make sure all sheds and garage areas that require treatment are unlocked and accessible for our technicians.
- Notify our technicians if there are any specific areas of your home you wish to exclude from the treatment.

## Control Period & After Care Program

This treatment comes with a 6-month After Care Program, which provides coverage for our technicians to revisit your property during this period for any issues related to spiders, native cockroaches, and earwigs.

Please note that after the initial treatment, it may take up to **30 days** to achieve full control of the pest population on-site.

## Payment Options

Payment for this treatment is required on the day of service. Gippsland Pest Management accepts cash, EFT, and cheque, and our staff are equipped with EFTPOS machines for credit card payments.
